

Enoch Oluwajoba

An innovative Computer Science and Software Engineering student with a passion for technological solutions that drive public health and safety. Through my internship at NAFDAC, I've demonstrated a unique ability to merge technical expertise with regulatory understanding, that will develop creative solutions that enhance operational efficiency and support critical administrative processes.

My approach combines technical prowess, strategic thinking, and a commitment to continuous learning, positioning me as a resourceful professional dedicated to leveraging technology for meaningful impact.

My goal is to contribute meaningfully to technological solutions that enhance safety, transparency, and efficiency in food and drug administration.
